Two Pockets Currency Sorter
BS-611

Features:

Functions

- Basic functions: Authentication, valuation, sorting by denomination,orientation,facing through a complete analysis of the banknote using different sensors(optical,IR,UV and MG)
- Advanced functions:FITNESS quality sorting(FIT/UNFIT)through a very stable analysis of the banknote state using different sensors and mechanisms(CIS-contact Image Sensor of 200 dpi, powerful UV, mechanical thickness checking).

Benefits

- Optical/Visible Array: Analysis by reflection on both side of the banknote and by transmission(resolution of 200 dpi) made in visible and IR that allows a total stability in the fitness sorting of the banknotes.
- IR sensor:Analysis of the IR pattern through a high resolution CIS.Authentication of the notes.
- Magnetic sensor:Analysis of strong magnetic pattern and weak magnetic pattern of banknote and metal thread.
- SN Capture:Capable to capture note serial No.can be printed and stored in memory card.
- RGB and UV sensors:Checking of the washed banknotes.
- Mechanical system of thickness checking: The most precise analysis of the quality of the banknotes (tear,adhesive,tape,double detection.)

User Interface

- Tactile screen: Large size touch screen with a resolution of 192 x64 pixels.
- User's information: Very explicit drawings,completely configurable menu for the user,sub-menus and rapid functions.
- Communications: RS232, USB, LAN
- Storage: SD card

Specifications:

Process speed: 800/1000 banknotes/min:
Authenticating, valuing, denomination and fitness quality sorting

Number of Slackers: I output pocket+ I reject pocket

Capacity of the slackers: 1x100 banknotes cxtcndablc upto 200 banknotes by software. Reject pocket up to 100 banknotes

Size: 310(H)x300(D)x350(L)mm

Weight: 13.Skgs

Currency type: USD, EUR, GBP, CNY, JPY, KRW, RUB, INR, IDR, TWD, HKD etc
