

# Banknote Counter

LD-7500

EB International Group Limited

[www.easy-banker.com](http://www.easy-banker.com)

## Features:

- Automatic start, stop and clear. Automatic half-note, chained note, double-note detection.
- UV (ultraviolet) detection: can detect banknotes with suspected UV properties, because fake notes often use white or bleached paper which will reflect UV light and make the surface of note very bright. Real banknotes can absorb UV light.
- MG (magnetic) detection: can detect banknotes without MG properties, because most of banknotes are printed using magnetic ink.
- Batch function: allows you to preset a specific number of bills that the machine will count up to.
- Add function: allows cumulative counting of all bills, up to a maximum of 999 bills.
- Suitable for most currencies in the world.
- DD detection: Banknotes are detected by width. The first note of a pile is defined as the reference width, and the message "Width Different" will be shown when a different width of note has been identified.
- To be with LCD screen display.

## Specifications:

Hopper Capacity(pcs):  $\geq 200$ pcs

Stacker Capacity(pcs):  $\geq 200$ pcs

Counting Speed(pcs/min) :  $\geq 1000$ pcs/min

Power Supply(V) : AC220V/50Hz AC110V/60Hz

Power Consumption(W):  $\leq 75$ W

Counting Display: 4 digits TFT

Batch Display: 3 digits TFT

Size of Countable Notes(mm): 50×110-90×180mm

Thickness of Countable Notes(mm): 0.075-0.15mm

Dimensions(mm): 308\*251\*217.5mm

Size of Color Box (mm): 365\*310\*255mm

Net Weight(kg): 7kg

Gross Weight (kg): 5.7kg
